

## Preliminary Intervention Plan for Chemistry

**Individually, what do we each already do to help students who are not learning and/or failing?**

After school tutoring

**How do we decide when to re-teach the entire class or remediate individual students?**

If  $\geq 20\%$  of the class is not proficient in SCOS objective covered on test reteach entire class, otherwise target individual students that are not achieving  $\geq 80\%$  proficiency on each SCOS objective.

### **Intervention**

- Students that do not achieve  $\geq 80\%$  on quizzes are requested to stay after school on all Tuesdays for remediation prior to test day.
- Students who are failing will be put on academic contract until they achieve a grade of  $\geq 78\%$  on subsequent test. Contracts will be issued every 4 weeks
