

Media/Technology Intervention Plan for 2010-11

Failed/Struggling learners:

At the beginning of each instructional session, media specialists will ask teachers to share with them which students are struggling and/or failed learners. We will give individualized attention to those students in an effort to help them with the given assignment as we circulate and instruct. We will share with the entire class that we are there to help them in any way we can by providing best resources for the given assignment and any additional help they may need.

The Media Center will accept students during their lunch period and before and after school to assist and support students with academic and technology projects and homework.

The Technology Coordinator will have an open door policy for students to come for technology assistance in creating projects or resolving technology problems.

Intentional non-learners:

For intentional non-learners we will use behavioral /cognitive modification strategies to help students gain focus and remain on task.

Is it working?

Observation of student progress and teacher input will assist the media staff in identifying if learning outcomes were achieved.
