

Tech Edu Intervention Plan

1. Students are encouraged to keep up with their grades on SPAN and to conference with teacher if there is a question or concern about their academic progress.
2. We will encourage students to use Blackboard to keep up with missing or current assignments.
3. We will review grades every 3 weeks for students who are failing. Our curriculum is mostly project based and the reason most of the students are failing is because they do not turn in many of their assignments. These students will be offered opportunities to come in before and after school or during lunch periods to work with the teacher in making up their assignments.
4. In regards to content, since each teacher in our PLT teacher different subjects, tutoring will be available to students on an individual basis with their respective teacher.
